Location: Berlin, Germany

Summary

Backend developer with 6 years of Python experience. I build REST APIs and background jobs with FastAPI, Django, PostgreSQL and Celery, and I care about tests and clear code.

Experience

Backend Developer | 2021 to present

Sample Logistics GmbH, Berlin

- Built the shipment tracking API with Python, FastAPI and PostgreSQL; it serves about 300,000 requests per day.
- Moved the nightly reports to Celery tasks; report time fell from 2 hours to 15 minutes.
- Took part in the migration of our services to AWS (ECS, S3).

Junior Python Developer | 2019 to 2021

Example Media AG, Hamburg

- Maintained the Django content services of the news site.
- Wrote integration tests for the publishing workflow.

Skills

- **Languages and frameworks:** Python, FastAPI, Django, Celery
- **Data:** PostgreSQL, Redis
- **Infrastructure:** Docker, AWS (ECS, S3), Git

Education

BSc in Business Informatics, Example University of Applied Sciences, 2019.

Languages

German (native), English (C1).
